

# IRON BED, SPRINGS AND MATTRESS

## ORE, BULLION AND DIVIDENDS

Eight Companies Have Ordered \$266,500 Paid This Month.

## STAR MEETING GOES OVER

DEEP CREEK OPERATOR BRINGS NEWS OF DISTRICT.

Ore and bullion settlements in the local open market during the week have been comparatively light. Friday being a holiday and the banks remaining closed yesterday has accounted to some extent for the decline. Though shipments from some of the camps still continue below normal on account of the roads and other causes which have nothing to do with the physical condition of the mines, reports from which during the week have been of the best. Settlements, as reported by McCormick & Co., amounted to \$12,800, yesterday's proportion of the total being \$2,300 as follows: Silver, lead, gold and copper ores, \$30,200; base bullion, \$25,700.

The big copper plants down the valley rolled out the usual amount of bullion carrying, in addition to the copper, heavy percentages of gold and silver as well. The figures, as given by the companies, are as follows:

Bingham Consolidated	152,250
United States	248,046
Utah Consolidated	292,750
Total pounds	734,125

The first half of the month closes on a record of dividends paid and declared for payment later in the month that is most gratifying. The list contains eight contributors, as follows:

Daily West	\$11,000
Silver King	100,000
Amalgam	12,500
Grand Central	12,500
Sacramento	5,000
South	5,000
Central	5,000
Utah, of Fish Springs	1,000
Total	\$266,500

## FROM DEEP CREEK.

M. R. Evans Brings Budget of News From District.

M. R. Evans, the well known Deep Creek operator, returned from a four months' trip to the diggings late Friday night. Mr. Evans and associates own a valuable group of claims in the Dutch Mountain end of the Deep Creek section and another in the Ferguson district, just at the line in Nevada. It was to look after the annual assessment work on each group that Mr. Evans went out last December, and he returns with the report that both properties are looking well, particularly the group at Ferguson, where a shaft is going down in the finest kind of a ledge.

While he did not visit them personally, Mr. Evans says the reports that the Western Pacific has been and still is putting down wells along the surveyed route of the Dutch Mountain and he had no reason to believe other than that they were going down, if they had not already been completed.

"While there has been very much doing in our end of this district this year," said Mr. Evans, "there appears to be every reason to expect that the Western Pacific will be in the lead in the building of the road. The points selected for the driving of the shafts indicate very plainly that the purpose is to supply construction gangs with water, and the claim owners of the districts are very much encouraged over the outlook."

Mr. Evans said that men were being put to work at the Dutch and yet he said at that point that the company intended to operate during the season with a force of about twenty-five men—eighteen in the mine and seven at the mill. That the latter was about ready to start was indicated in the fact that the water haulers had been instructed to report for duty.

The Queen of Sheba, Mr. Evans reports, is counted as one of the best gold propositions in that region and when the valuing factions were put to rest their affairs straightened out, he believes the mine will make a record that will surprise the natives.

## STAR MEETING POSTPONED.

Another Week Given Secretary and Credentials Committee.

The shareholders of the Star Consolidated company met in adjourned session yesterday morning, transacted little business and took another recess for a week, the motion to adjourn being to Saturday morning next at 10 o'clock.

When Chairman Booth called the meeting to order, W. J. Bateman, of the credentials committee stated that it would be impossible to present a report showing who were entitled to vote for several days. There had been such a deluge of applications for the transfer of stock that Secretary Packard would not be able to make them and get his books in shape for the credentials committee for some time.

After considerable discussion, during which the shareholders present expressed themselves as being determined that the books of the company should be straightened out and everything presented in proper order before an election was permitted, a motion prevailed that was calculated to expedite matters. It was to the effect that W. J. Bateman be employed by the stockholders to assist Secretary Packard in making transfers and checking up the stock ledgers and stock certificate books and that a week be given in which to complete the task.

In response to an inquiry Chairman Booth ruled that the books could not be closed against the transfer of stock until the next session was held, owing to the fact that the call for the annual meeting had not specified when the shareholders it was possible for any shareholder to have his stock transferred at Secretary Packard's rooms at the Kenyon up to the hour of meeting on Saturday next.

## BINGHAM'S BUSTLING CAMP.

Yampa Smelter Doing Well—Butler-Liberal Milling Ore.

(Bingham Bulletin.)

J. B. Stephens, owner of the Julia S. (Clippers) mill group, and a promising group below the Dalton and Park, is in camp looking after his interests. The Dewey mill has been running on Red Wing Extension ore this week and has a 1,000-ton lot of Butler-Liberal in sight. There is a good prospect that the Dewey will have plenty to do this spring and summer.

A fine quality of ore is being treated at the Ohio company's mill this week much better than was the average of a couple of weeks ago. The mill has attained a record of 100 tons a day, and the quality of its product is excellent.

It is said a majority of the board of directors of the Boston Consolidated for the erection of a smelter in connection with the mine, to begin at an early date as possible. Preliminary steps are likely to be taken this season.

In several Bingham localities there are numbers of gold claims which can be formed into groups and some parties are quietly making investigations with the view of making consolidations and forming companies to operate them.

It is certain rumors move well founded, that will soon be a number of important strikes in Bingham for the newspapers to record. At present parties in charge of the properties, where they are alleged to have occurred admit there is a lien on, but wink the other eye and say she is not running yet.

The Yampa smelter is now receiving ore from 100 to 150 tons of straight ore are being put through daily, with very satisfactory results. This will be pleasant news to impart to Captain Stern and Manager Robinson, who are to arrive at Salt Lake from the north tomorrow and will probably visit the mine and smelter Sunday.

## MR. LANDER MAKES STATEMENT

Tells of His Connection With Star Consolidated.

To The Salt Lake Herald:

As my name has been used several times in your paper in such manner as to convey a wrong impression of my connection with the affairs of the Star Consolidated Mining Company, I beg you to insert the following statement of facts:

Some time since I learned that the company was exhausted and that there remained in the mine and on the dump a large quantity of ore too low in grade to bear smelter charges. I then proposed to a number of leading stockholders a plan by a new process, and thus convert that which is now without value into a valuable asset of the company. I offered to build a first-class mill at my own expense and run it for ninety days under their inspection and to guarantee an extraction of 80 per cent of values in silver and copper at a total cost of not exceeding \$3.50 per ton. If I failed, the whole loss was to fall upon me, but I succeeded. I was to receive for the risk involved, for use of patented process and apparatus, a half interest in the mine, which at market quotations was worth about \$25,000.

The stockholders referred to thought well of the proposition, and after it had been drawn up by their lawyer agreed to favor its acceptance at a special meeting of the stockholders to be called for that purpose, but which has not yet been held. When it is held there will be full opportunity for all to see the plan and to accept or reject it upon its merits, a two-thirds vote of stock represented being requisite, as understood, for acceptance.

It is a complete error to assume, as has been done, that the present annual meeting is called for acting upon this question. Practically the only business which can lawfully be transacted is the election of officers. My presence at this meeting is simply as a shareholder, in the exercise of my right as such.

I make this statement that no stockholder at this meeting may be prejudiced one way or the other in the selection of officers by any proposition which I have made or may make.

W. V. LANDER.

Salt Lake, April 16.

## COCONINO REORGANIZATION.

Committee Named to Bring Out the Proposition.

It was learned yesterday that the reorganization of the Conoco Copper Mining company has been turned over to a committee consisting of Donald D. Grant and son of Fairholt, Minn., and James Tiers of this city. The old company was a New Jersey corporation with a capital stock of 600,000 shares. The reorganized company is a corporation of Arizona and has a capital of 500,000 shares, the increase to be applied in equipping the mines for ready production.

What the plan of campaign will be and the time for its inauguration are matters that have been left entirely in the hands of the committee, which is expected to make an investigation and get things moving just as soon as possible after the completion of the reorganization. The committee has the purpose of the ground what is termed a "copper farm." The ore is all found in a "blanket" formation right at the surface of the ground and it is said the ore can be mined with teams and scrapers. It is located just over the line dividing Utah and Arizona, and when Henry M. Ryan first undertook his exploitation he announced that it was his intention to put a line of steam wagons on the road to take in supplies and bring ore to the surface in that direction.

A mill calculated to employ the Neil leaching process was installed, but instead of being used for the purpose of the process and installed by the engineers, the proposition was turned over to others, who failed to bring it out in the manner that it should have been. What the new company will do has not yet been decided.

## LONE MOUNTAIN MINES.

Property Owners Getting Ready For Completion of Tonopah Road.

James T. Fulton returned from a trip to Tonopah and Lone Mountain yesterday morning, accompanied by Martin Blum of Springfield, O., who is on his way home from round-up of the various Nevada camps.

Mr. Fulton secured a block of claims at Lone Mountain during his absence, out of which he expects to make a good thing in the near future. All the properties at that camp, he says, are looking remarkably well and the mine managements are enthusiastic over the prospects. For the completion of the Tonopah railroad, which means that the Lone Mountain area will need to be hauled by team only from four to eight miles when the line is in operation.

J. W. Langley, who went to Nevada with him, is expected to return in another day or two. The Langley connection is an Anacoda property. Mr. Fulton reports it is a very fine one, and as the prospective litigation which was threatened has all been straightened up since Mr. Langley went to camp, the future of the proposition is assured. The Tonopah-Belcher, in which Mr. Fulton holds a big block of stock, is developing into the biggest kind of a mine and after the railroad is finished it will be a regular contributor to the smelters in this valley.

## Beaver County Mining Notes.

(Milford Times.)

Fred Kelly, who has served the Majestic as engineer and assayer for a year and a half, left for Denver last Saturday, accompanied by Mrs. Kelly.

P. B. McKee returned from Chicago last Saturday and reports that satisfactory progress is being made on the Pullman deal, but there is nothing definite to be announced at this time. He states that there is an abundance of money in the east for investment in mining properties of merit.

Through the solicitation of Receiver Tanner, Mr. Hays has presented his fine collection of Majestic mineral specimens to the Beaver branch of the Brigham Young university. The collection includes some magnificent samples and will be greatly appreciated by the institution. Each specimen was labeled by Engineer Fred Kelly.

John McAnulty returned Saturday from his Pine Grove mine, where he found conditions most encouraging. The shaft is now down eighty-five feet and the vein shows steady improvement. There is a streak of ore twenty inches wide that assays 125 ounces silver, with kidneys of much higher grade scattered through it. A block of the stock was sold last week to Mr. Herz of Salt Lake.

A special meeting of the stockholders of the Milford Mines Investment company, which owns the Roosevelt hot springs, was held last Monday, when a new set of officers and directors was elected, as follows: P. B. McKee, president and manager; Clarence Eae, Chicago, vice president; John McKee, secretary; J. L. Moore, Salt Lake, treasurer; directors, E. W. Gillett, A. Rees, D. S. Spencer, Salt Lake; Colonel Robert R. General John C. Black, Chicago. It will be noticed that several prominent railroad men have been placed on the board and it is intimated that plans are on foot to improve and build up the resort.

## MINING STOCK EXCHANGE.

Merciless Hammering of Daily-West Made the Week Slumpy.

While business on the mining exchanges during the past week was light, and included only five days' trading, it exceeded that of the previous week by more than 2000 shares of stock and several hundred dollars in money. The total

United States	25	20 1/2	20 1/2	20 1/2	20 1/2
Utah	177	23 1/2	23 1/2	23 1/2	23 1/2
Boston Con.	100	5 1/2	5 1/2	5 1/2	5 1/2

## Mining Notes.

Tintic Mine: The Bullion-Beck is from thirty to ninety days behind with its payroll and leasers accounts all the time. It works on a basis of cash and on the merchants, who must carry them for supplies and household necessities. There is no excuse for such procedure, especially in the case of leasers, who should have their money as soon as the smelter check is received by the company.

The Oasis Gold & Copper Mining & Milling company yesterday filed articles of incorporation with the county clerk. It is capitalized for \$200,000, divided into shares of \$1 each. The officers are: M. S. Browning, president; John T. White, vice president; Joseph B. Toronto, treasurer; and Joseph A. Jennings, secretary. J. H. Clive completes the directory.

Miles Finlen, the well known Butte mining operator who has been in town for more than a week past, will leave for home again tomorrow.

Martin McGrath, who has made an inspection of the Majestic copper claim, has been coming from the opinion that a mine will be made of it.

According to the Tintic Miner six leases have been let at the Vision company's property. They cover ground from the 200 to the 300-foot levels and will be operated under the supervision of former Superintendent Joseph Treloar, who will undertake a deep shaft to the level below the 200 level. The company is to receive a royalty of one-third on all ores and pay one-half the transportation and smelter charges.

The new compressor and other machinery for the Eagle & Blue Bell was delivered at the mine yesterday.

After an absence of five weeks in New Mexico, where he has been experting mining properties for eastern clients, T. R. Ryan has returned to the company of the Summit Placer company's properties at Soldier Summit.

Six cars of ore from Tintic and two from Fish Springs were reported at the Taylor & Bruntson sampler yesterday.

Secretary C. O. Ellingwood of the Western Exploration company left for the San Francisco headquarters again last night. He expects to return some time next month.

C. H. Doolittle, manager of the Utah & Eastern Copper company's Dixie mines and smelter, is up from the south on a short trip to Salt Lake.

Manager Farnsworth of the Bullion-Beck, says there is no immediate prospect of a deal from the company. The \$50,000 received from the Eureka-Hill has already been used up in development previously done.

Contractor Joseph Dederich returned from Newhouse, in Beaver county, yesterday morning.

Challis Silver Messenger: We are advised that the Oregon Short Line railroad will soon issue an order of \$1 per ton freight on ores running less than \$9 per ton in value from Mackay to the Salt Lake smelters. This is the same rate granted Wood River points, and it will be of great advantage to shippers who have this class of ore near the railroad.

Verbal Express: S. P. Barron and W. B. Beck of the American smelter association, came in from Rifle Thursday evening. Mr. Barron informs us that the company is still shipping considerable ore, but the condition of the roads has had the effect of cutting down the monthly output. When asked concerning the proposed branch road from Rifle to Meeker, Mr. Barron stated that the projectors of the enterprise seem very much in earnest and declare that the road will be built, not only to Meeker, but on down White river as surmised in a recent issue of the Express.

## Park City Ore Shipments.

(Special to The Herald.)

Park City, April 16.—The ore shipments for the week were:

	Pounds.
Ontario	66,000
Daily-West	2,523,000
Kearney-Roth	31,000
Silver King	1,796,000
Total	5,108,000

## Local Metal Market.

Silver, 13 1/2 cents per ounce.  
Copper (castings), 12 1/2 cents per pound.  
Lead, \$2.00 per 100 pounds.
